

Is Your Company Website...

- Flat, featureless and lacking pizzazz?
- Presenting out-of-date information?
- Costing you money and not adding anything to the bottom line?
- Telling the world that you're not in the 21st century yet?
- Not connected to your business via e-commerce?
- Lost in a tangle of pages that no one can find?
- Being maintained by overpriced consultants that don't give you what *you* want?
- Nonexistent?

If you're like most businesses, you've probably answered "yes" to at least one of these questions. You want to create a web presence for your company, but you don't want to spend a barrel of money on a team of consultants that wind up working longer at your business than you do.

There is a solution....

WKR Consulting, based in Long Island, NY, has employees with over 25 years of experience in the Information Technology field. From custom e-commerce programming to database management, web design and development to user training, *WKR* can help your business reach its fullest potential at a rate you can't afford to pass up.
